Professional Summary

Full Stack Developer with experience building scalable backend systems using Node.js, Express.js, PostgreSQL, Redis, Docker, and TypeScript. Experienced in designing REST APIs, microservices, CI/CD pipelines, VPS deployments, and AI-powered applications using FastAPI and RAG. Passionate about building production-ready SaaS platforms and cloud-native applications.

Work Experience:

Junior Web Developer | Uttaranchal University

July 2025 – Present | Dehradun, Uttarakhand

- Used Next.js, React, and contemporary frontend technologies to create and manage the university's official website.
- Reduced manual labor by 70% and increased team productivity by 40% by automating the university's CMS with n8n, AI workflows, and custom automation.
- For the IQAC department, I designed and implemented the backend of an event management system using Node.js, Express.js, PostgreSQL, Redis Queue, Docker, and Microservices Architecture.
- Using Docker, PostgreSQL, and Microservices, I developed and implemented Pragati, a centralized internal portal that reduced administrative work by thirty percent.
- Using GitHub Actions, a CI/CD pipeline was designed and put into place to automatically deploy Pragati to the university's local VPS server, allowing for faster and more dependable releases.
- Linux, containerized services, and Docker Compose were used to manage the deployment of applications.

Intern | Uttaranchal University (On-site)

July 2025 – August 2025 | Dehradun, Uttarakhand

- Collaborated with the frontend team to develop the university's official website using **Next.js** and AI tools like **v0**.
- Improved website performance and SEO, achieving a **40% increase in SEO score**.

Projects

Pragati – Centralized Administrative Portal ([GitHub link](#))

Tech Stack: Node.js, Express.js, PostgreSQL, Docker, GitHub Actions, Linux, Docker Compose

- Designed and developed a centralized portal for the IQAC department.
- Containerized services using Docker and orchestrated deployments with Docker Compose.
- Built a complete **CI/CD pipeline using GitHub Actions** to automatically deploy updates to a **local VPS server**.
- Improved administrative efficiency by **30%** through centralized data management.

AI Resume Analyzer (RAG) ([GitHub link](#))

Tech Stack: Node.js, FastAPI, Python, PostgreSQL, pgvector, Groq API, Gemini Embeddings, Docker

- Built an AI-powered Resume Analyzer using **Retrieval-Augmented Generation (RAG)**.
- Implemented semantic search with **pgvector** and **Gemini Embeddings** for document retrieval.
- Integrated the **Groq API** to generate fast, context-aware responses.
- Developed the RAG engine with **FastAPI** and containerized the application using **Docker**.

University Event Management System

Tech Stack: Node.js, Express.js, PostgreSQL, Redis, Docker, Microservices

- Built a scalable backend using a microservices architecture.
- Implemented Redis queues for asynchronous event processing and notifications.
- Developed REST APIs for event creation, approval, scheduling, and publishing.
- Containerized the application using Docker for consistent deployments.

Technical Skills

- Languages: TypeScript, JavaScript, Python, SQL
- Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Lenis, GSAP
- Backend: Node.js, Express.js, REST APIs, Microservices, JWT, Prisma ORM, Zod, Role-Based Access Control (RBAC), Repository Pattern
- Databases: MongoDB, PostgreSQL, Redis
- Tools & Platforms: Git, GitHub, GitHub Actions, Docker, Docker compose, VS Code, Figma, Vercel, Railway
- AI & Automation Tools: GitHub Copilot, Claude, Antigravity, v0, n8n
- Core Concepts: Data Structures & Algorithms, OOP, System Design Basics, Reverse Proxy

Education

- **Master of Computer Applications (MCA)**
Uttaranchal University, Dehradun | 2023 – 2025
- **Bachelor of Science (PCM)**
Shri Dev Suman University, Tehri | 2019 – 2022
Kotdwara, Uttarakhand

Extracurricular Activities

- I contributed to the user interface and real-time interaction elements using socket-based communication while working as a member of the frontend team for Prashan Baan, an offline quiz application created using Python.
- developed interest in investigating AI-assisted programming tools and creating useful, real-world applications.
